## RISK FACTORS

Potential investors should consider that an investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for New Options pursuant to this Prospectus. Some of the key risks associated with an investment in the Company are summarised in the following table. This list of risks is not exhaustive. Full details of the risks tabled below and other risk factors are set out in **section 8** of this Prospectus. The occurrence of any of the risks or events outlined below could have a materially adverse effect on the Company's operations and, in turn, the price at which its Securities trade on ASX.

Risk Area	Risks	Section Reference
Future Capital Requirements	<p>The Company's activities will require substantial expenditures. The funds raised through the Offer will not be sufficient to successfully achieve all the objectives of the Company's overall business strategy. If the Company is unable to use debt or equity to fund expansion after the substantial exhaustion of the net proceeds of the Offer there can be no assurances that the Company will have sufficient capital resources for that purpose, or other purposes, or that it will be able to obtain additional resources on terms acceptable to the Company or at all. Any additional equity financing may be dilutive to Shareholders and any debt financing if available may involve restrictive covenants, which limit the Company's operations and business strategy.</p> <p>The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.</p>	8.10
Mineral Resource Estimates	<p>Resource estimates are expressions of judgment based on knowledge, experience and resource modelling. As such, resource estimates are inherently imprecise and rely to some extent on interpretations made. Despite employing qualified professionals to prepare resource estimates, such estimates may nevertheless prove to be inaccurate. Furthermore, resource estimates may change over time as new information becomes available. Should the Company encounter mineralisation or geological formations different from those predicted by past drilling, sampling and interpretations, resource estimates may need to be altered in a way that could adversely affect the Company's operations.</p>	8.13
Market Conditions	<p>The market price of Existing Shares and New Options can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities and in particular, resources stocks. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.</p>	8.3
General Risks	<p>Economic risks, commodity price, reliance on key personnel, market conditions, general resource sector risks, regulatory risk and other risks exist in relation to an investment in the Company.</p>	8

Dear Shareholder

As a Shareholder in Core Exploration Limited ("**Core**", or the "**Company**") your Directors are pleased to invite you to participate in a non-renounceable Rights Issue to raise up to \$0.13 million in funds (before costs) on the basis of one New Option for every four Existing Shares held as at the Record Date at an issue price of \$0.003 each pursuant to this Prospectus. The rights issue is fully underwritten by InSync Equity Services Pty Ltd.

The Company has incorporated a Shortfall facility whereby Eligible Shareholders may apply for Additional New Options in excess of their Entitlement at the same price.

The funds raised will be used by the Company to provide working capital.

Core is focussed on actively pursuing significant discoveries in new and world class exploration terrains that have the potential to create substantial step changes in the value for our shareholders. In pursuing this strategy, the Company as recently completed two drilling programs on the Yerelina Project in SA and Jervois Domain in the NT and is continuing to actively advance its exploration projects.

Core has completed drilling on the Company's 100%-owned Jervois Domain tenements in the NT. Drilling is focussed within a large, 20km long prospective zone that has similar structural and geophysical features to KGL's (ASX:KGL) nearby Jervois Project. These geophysical targets and models fit well with Sedex/VHMS model proposed for the mineralisation at Jervois by recent NTGS research.

Core has also recently completed the first drilling program on the Company's Yerelina zinc-lead-silver project on EL 5015, which covers a 1,000km<sup>2</sup> area in northern South Australia. Core's diamond drilling is targeted under the outcropping high grade mineralisation identified at Great Gladstone and Big Hill Prospects. The results from recent drilling have recorded that drill core has intersected mineralised breccias and veining at both these prospects. Drill assay results for both these exciting drilling programs are expected toward the end of November 2015.

In August 2015, Core entered into a Memorandum of Understanding (MOU) with an offshore organisation to negotiate the final terms of a Joint Venture to advance Core's Inkheart and Blueys Project in the Northern Territory. Core is working toward completing a binding joint venture agreement by the end of calendar 2015.

Your support of this fundraising is important. The proceeds of the Rights Issue will enhance the future of the Company. On behalf of the Board, I invite you to consider the contents of this Prospectus carefully and to consult with your financial advisor and encourage you to participate in the Rights Issue. The Directors have indicated that they will be participating in the Rights Issue.

Yours faithfully,

Greg English  
Chairman

### 3 DETAILS OF THE OFFER

#### 3.1 The Offer

The Offer is being made as a non-renounceable pro rata entitlements issue to Eligible Shareholders of approximately 43,666,074 New Options (assuming no Options are exercised before the Record Date) on the basis of one New Option for every four Existing Shares held as at the Record Date at an issue price of \$0.003 each (0.3 cents) to raise approximately \$0.13 million before issue costs pursuant to this Prospectus.

The Company currently has 174,664,295 Existing Shares on issue and has granted 30,400,000 unlisted Options, all of which are currently eligible for conversion ("**Eligible Options**"). To be entitled to participate in the Rights Issue, the holders of the Eligible Options must first exercise their Options in accordance with the terms of those Options and must do so prior to the Record Date.

In the event that no Eligible Option holders exercise their Options prior to the Record Date, Shareholders holding the Existing Shares will be entitled to participate in the Rights Issue pursuant to this Prospectus, which will result in the issue of up to 43,666,074 New Options.

In the event that all Eligible Options are exercised prior to the Record Date, this Prospectus will also offer to those Shareholders a further 7,600,000 New Options to raise a further \$22,800 (before issue costs).

The capital structure of the Company in each circumstance would be as follows:

<b>Example 1: No exercise of Eligible Options</b>	<b>Shares</b>	<b>Options</b>
Existing Securities	174,664,295	30,400,000
Issue of New Options under the Offer	-	43,666,074
<b>Total Securities on issue after the Offer (no Eligible Options exercised)</b>	<b>174,664,295</b>	<b>74,066,074</b>
<b>Example 2: Exercise of all Eligible Options prior to Record Date</b>		
Existing Securities	174,664,295	30,400,000
Issue of Shares on exercise of all Eligible Options <sup>1</sup>	30,400,000	(30,400,000)
Securities on issue as at the Record Date	205,064,295	-
Issue of New Options under the Offer	-	51,266,074
<b>Total Securities on issue after the Offer (all Eligible Options exercised)<sup>1</sup></b>	<b>205,064,295</b>	<b>51,266,074</b>

Notes:

1. The Board considers it highly unlikely that any of the Eligible Options will be exercised before the Record Date given the exercise prices of these options range from \$0.05 to \$0.10 and the closing price of Shares as quoted on ASX on the date prior to lodgement of this Prospectus was \$0.026. For further details see **section 4.5**.

#### 3.2 No Minimum Subscription

There is no minimum subscription for the Offer.

#### 3.3 Entitlement to Rights Issue

Eligible Shareholders who are on the Company's Share Register at the close of business on the Record Date are eligible to participate in the Offer.

Fractional Entitlements will be rounded up to the nearest whole number of New Options. For this purpose, holdings in the same name are aggregated for calculation of Entitlements. If the Company considers that holdings have been split to take advantage of rounding, the Company reserves the right to aggregate holdings held by associated Shareholders for the purpose of calculating Entitlements.

An Application Form setting out your Entitlement to New Options accompanies this Prospectus.

### **3.4 Acceptances**

This Offer may be accepted in whole or in part prior to the Closing Date subject to the rights of the Company to extend the Offer period or close the Offer early.

Instructions for accepting your Entitlement are set out in section 5 and on the Application Form which accompanies this Prospectus.

### **3.5 Applying for Additional New Options**

Entitlements not taken up may become available as Additional New Options.

Eligible Shareholders may, in addition to their Entitlement, apply for Additional New Options regardless of the size of their present holding.

It is possible, particularly if there is strong interest in the Offer, that there will be few or no Additional New Options available for issue. It is an express term of the Offer that applicants for Additional New Options will be bound to accept a lesser number of Additional New Options allocated to them than applied for. If a lesser number is allocated to them, excess Application Money will be refunded without interest.

The Company reserves the right to scale back any applications for Additional New Options in consultation with the Underwriter.

The offer of Additional New Options is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the Closing Date. The issue price for each Additional New Option to be issued under the Additional New Options offer shall be \$0.003 being the price at which New Options have been offered under the Offer.

### **3.6 Underwriting**

The Offer is fully underwritten by InSync Equity Services Pty Ltd. A summary of the Underwriting Agreement is set out in section 8.2 of the Prospectus.

### **3.7 Effect of the Offer on Control of the Company**

Section 606 of the Corporations Act provides that a person cannot acquire a relevant interest in issued voting shares in a company if because of the transaction in relation to securities, a person's voting power in the company increases from 20% or below to more than 20% (or from a starting point that is above 20% and below 90%). Accordingly, a person may be restricted from exercising the New Options the subject of the Offer in the event that their voting power was to exceed 20%.

There are exceptions to that prohibition, including an acquisition made with the approval of shareholders. In the context of the Offer, Shareholder approval would be required if any person were to otherwise increase their shareholding above 20% in the Company upon the issue of Shares on exercise of any Options, including any New Options or Additional New Options.

Accordingly, the Offer itself will not have any effect on the control of the Company and any control issues that might arise upon the issue of the Shares upon exercise of the New Options will be subject to Shareholder approval (and the Corporations Act generally).

The Company reserves the right to reject or scale back any application for Additional New Options which it considers may result in breach of section 606 upon the issue of Shares on exercise of those Additional New Options.

### **3.8 Allotment and Application Money**

New Options will be issued only after all Application Money has been received and ASX has granted permission for the New Options to be quoted. It is expected that the New Options will be issued on 25 November 2015 and normal trading of the New Options on ASX is expected to commence on 26 November 2015.

All Application Money received before New Options are issued will be held in a special purpose account. After Application Money is refunded (if required) and New Options are issued to applicants, the balance of funds in the account plus accrued interest will be received by the Company.

Application will be made within seven days of the date of issue of this Prospectus for the New Options to be granted Official Quotation by ASX. If such an application is not made within these seven days, or Official Quotation of the New Options and Existing Options is not granted by ASX within three months of the date of this Prospectus, then the Company will not allot or issue any New Options and all Application Money received pursuant to this Prospectus will be repaid as soon as practicable, without interest.

If the New Options are not quoted by ASX within three months after the date of this Prospectus, the Company will refund all Application Money in full.

The fact that ASX may agree to grant Official Quotation of the New Options and Existing Options is not to be taken in any way as an indication of the merits of the Company or the New Options or Existing Options. ASX takes no responsibility for the contents of this Prospectus.

### **3.9 Offer Outside Australia and New Zealand**

This Prospectus does not constitute an offer of New Options in any jurisdiction where, or to any person to whom, it would not be lawful to issue the Prospectus or make the Offer. No action has been taken to register or qualify the New Options or the Offer or otherwise to permit an offering of the New Options in any jurisdiction outside Australia and New Zealand.

This document is not for publication or distribution, directly or indirectly, in or into the United States of America (including its territories and possessions, any state of the US and the District of Columbia). This document is not an offer of securities for sale into the United States or to, or for the account or benefit of, US Persons. The securities referred to herein have not been and will not be registered under the US Securities Act of 1933, as amended, and may not be offered or sold in the United States or to, or for the account or benefit of, US Persons. No public offering of securities is being made in the United States.

### **3.10 Treatment of Overseas Shareholders**

The Offer in this Prospectus is not being extended to any Shareholder, as at the Record Date, whose registered address is not situated in Australia or New Zealand because of the small number of such Shareholders and the cost of complying with applicable regulations in jurisdictions outside Australia and New Zealand. The Prospectus is sent to those Shareholders for information purposes only.

The Offer contained in this Prospectus to Eligible Shareholders with registered addresses in New Zealand is made in reliance on the Securities Act (Overseas Companies) Exemption Notice 2013 (New Zealand). Members of the public in New Zealand who are not existing Shareholders on the Record Date are not entitled to apply for any Securities.

Recipients may not send or otherwise distribute this Prospectus or the Application Form to any person outside Australia (other than to Eligible Shareholders).

### **3.11 Market Prices of Existing Shares on ASX**

The highest and lowest market sale price of the Existing Shares, which influence the market price of the New Options (once quoted) being offered under this Prospectus, during the three months immediately preceding the lodgement of this Prospectus with the ASIC, and the last market sale price on the date before the lodgement date of this Prospectus, are set out below.

	<b>3 months high</b>	<b>3 month low</b>	<b>Last market sale price<sup>1</sup></b>
<b>Existing Shares</b>	\$0.029 on 31 August 2015	\$0.022 on 1 October 2015	\$0.026 on 26 October 2015

<sup>1</sup> Prior to announcement of the Offer.

### **3.12 Opening and Closing Dates**

The Offer will open for receipt of acceptances on 9 November 2015 and will close on 18 November 2015, subject to the right of the Company to vary these dates in accordance with the ASX Listing Rules.

### **3.13 CHESS**

The Company participates in the Clearing House Electronic Sub-register System (“CHESS”) for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHESS will be issuer sponsored by the Company.

Under CHESS, applicants will not receive a certificate but will receive a statement of their holding of New Options.

The CHESS statement will set out the number of New Options issued under this Prospectus, provide details of your holder identification number and give the participation identification number of the sponsor.

If you are registered on the issuer sponsored sub register, your statement will be dispatched by the Company’s share registrar and will contain the number of New Options issued to you under this Prospectus and your security holder reference number.

A CHESS statement or issuer sponsored statement will routinely be sent to Shareholders and/or Optionholders at the end of any calendar month during which the balance of their shareholding and/or option holding changes. Shareholders and Optionholders may request a statement at any other time, however, a charge may be made for additional statements.

### **3.14 Rights and Liabilities attaching to the New Options**

The New Options will form a new class of quoted security.

A summary of the rights and liabilities attaching to the New Options is set out in **section 6.1**.

### **3.15 Taxation Implications**

The Directors do not consider that it is appropriate to give Shareholders advice regarding the taxation consequences of the Company conducting the Rights Issue or Shareholders applying for New Options under this Prospectus, as it is not possible to provide a comprehensive summary of the possible taxation positions of Shareholders. The Company, its advisers and officers, do not accept any responsibility or liability for any taxation consequences to Shareholders in the Offer. Shareholders should, therefore, consult their own professional tax adviser in connection with the taxation implications of the Offer.

### **3.16 Enquiries**

Any questions concerning the Offer should be directed to Mr Jarek Kopias, the Company Secretary, on (08) 7324 2987.

Any queries regarding the Entitlement and Acceptance Form should be directed to the Share Registry on +61 8 9315 2333.

You can also contact your stockbroker or professional adviser with any queries in relation to the Offer.

## 4 PURPOSE AND EFFECT OF THE OFFER

### 4.1 Purpose of the Offer

The purpose of the Offer is to raise up to approximately \$0.13 million before costs.

In the event that circumstances change or other opportunities arise, the Directors reserve the right to vary the proposed use of funds to maximise benefits to Shareholders. On completion of the Offer, the Board believes the Company will have sufficient working capital to achieve its objectives.

### 4.2 Effect of the Offer and Pro Forma Statement of Financial Position

The following is a summary of the more significant rights and liabilities attaching to Shares being the underlying securities of the New Options to be issued pursuant to this Prospectus. This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders. To obtain such a statement, persons should seek independent legal advice.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) Voting Rights

Subject to the Constitution of the Company and any rights or restrictions at the time being attached to a class of shares, at a general meeting of the Company every Shareholder present in person, or by proxy, attorney or representative has one vote on a show of hands, and upon a poll, one vote for each Share held by the Shareholder. ## **7 RISK FACTORS**

### **7.1 General**

An investment in the Company is not risk free and investors should consider the risk factors described below, together with information contained elsewhere in this Prospectus, before deciding whether to apply for New Options. Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for New Options.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

### **7.2 Economic Risks**

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and future production activities, as well as on its ability to fund those activities.

### **7.3 Research and Development**

The Company has claimed the research and development tax offset for the year ended 30 June 2013 for a total amount of \$296,140. Of the total claim, \$257,735 is currently being reviewed by AusIndustry as part of their internal processes. AusIndustry has not advised the Company of a decision in relation to the claim. A negative result in relation to the review by AusIndustry may result in some or all of the research and development tax offset, and accrued interest if applicable, being repaid.

### **7.4 Market conditions**

The market price of Existing Shares and New Options can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities and in particular, resources stocks. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

### **7.5 Security Investments**

Applicants should be aware that there are risks associated with any investment in securities. Securities listed on the stock market, and in particular securities of mining and exploration companies have experienced extreme price and volume fluctuations that have often been unrelated to the operating performances of such companies. These factors may materially affect the market price of the Company's Securities regardless of the Company's performance.

Mineral exploration and mining are speculative operations that may be hampered by circumstances beyond the control of the Company. Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management.

Exploration in itself is a speculative endeavour, while mining operations can be hampered by force majeure circumstances and cost overruns for unforeseen events.

### **7.6 Exploration and Evaluation Risks**

The success of the Company depends on the delineation of economically minable reserves and resources, access to required development capital, movement in the price of commodities, securing and maintaining title to the Company's exploration and mining tenements and obtaining all consents and approvals necessary for the conduct of its exploration activities.

Exploration on the Company's existing exploration and mining tenements may be unsuccessful, resulting in a reduction of the value of those tenements, diminution in the cash reserves of the Company and possible relinquishment of the exploration and mining tenements.

In the case of exploration targets, it should be noted that these are conceptual in nature, there has been insufficient exploration to define a Mineral Resource and that it is uncertain if further exploration will result in the determination of a Mineral Resource.

### **7.7 Commodity Price and Exchange Rate Risks**

To the extent the Company is involved in mineral production the revenue derived through the sale of commodities may expose the potential income of the Company to commodity price and exchange rate

risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of various commodities are denominated in United States dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar as determined in international markets.

#### **7.8 Environmental Risks**

The operations and proposed activities of the Company are subject to State and Federal laws and regulation concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Company attempts to conduct its activities to the highest standard of environmental management, including compliance with all environmental laws.

#### **7.9 Native Title and Title Risks**

Interests in tenements in Australia are governed by the respective State legislation and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest; there may be areas over which legitimate common law native title rights of Aboriginal Australians exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be affected.

The Directors closely monitor the potential effect of native title claims involving tenements in which the Company has or may have an interest.

#### **7.10 Joint Venture Parties, Agents and Contractors**

The Directors are unable to predict the risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

#### **7.11 Future Capital Requirements**

The Company's activities will require substantial expenditures. The funds raised through the Offer will not be sufficient to successfully achieve all the objectives of the Company's overall business strategy. If the Company is unable to use debt or equity to fund expansion after the substantial exhaustion of the net proceeds of the Offer there can be no assurances that the Company will have sufficient capital resources for that purpose, or other purposes, or that it will be able to obtain additional resources on terms acceptable to the Company or at all. Any additional equity financing may be dilutive to Shareholders and any debt financing if available may involve restrictive covenants, which limit the Company's operations and business strategy.

The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.

#### **7.12 Potential Acquisitions**

As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions of companies, products, technologies or resource projects.

#### **7.13 Legislative changes and Government policy risk**

Changes in government regulations and policies may adversely affect the financial performance of the Company. The Company's capacity to explore and mine, in particular the Company's ability to explore and

mine any reserves, may be affected by changes in government policy, which are beyond the control of the Company

#### **7.14 Resource Estimations**

Resource estimates are expressions of judgment based on knowledge, experience and resource modelling. As such, resource estimates are inherently imprecise and rely to some extent on interpretations made. Despite employing qualified professionals to prepare resource estimates, such estimates may nevertheless prove to be inaccurate. Furthermore, resource estimates may change over time as new information becomes available. Should the Company encounter mineralisation or geological formations different from those predicted by past drilling, sampling and interpretations, resource estimates may need to be altered in a way that could adversely affect the Company's operations.

#### **7.15 Reliance on Key Personnel**

The Company's success depends largely on the core competencies of its directors and management, and their familiarisation with, and ability to operate, in the metals and mining industry and the Company's ability to retain its key executives.

## 8 ADDITIONAL INFORMATION

### 8.1 Continuous Disclosure Obligations

The Company is a "disclosing entity" (as defined in section 111 AC of the Corporations Act) for the purposes of section 713 of the Corporations Act and, as such, is subject to regular reporting and disclosure obligations. Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company's securities.

This Prospectus is a "transaction specific prospectus" to which the special content rules under section 713 of the Corporations Act apply. That provision allows the issue of a more concise prospectus in relation to an offer of securities in a class which has been continuously quoted by ASX in the three months prior to the date of the prospectus or options to acquire such securities.

In general terms "transaction specific prospectuses" are only required to contain information in relation to the effect of the issue of New Options on the Company and the rights attaching to the New Options. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 12 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
- (c) it will provide a copy of each of the following documents, free of charge, to any person on request between the date of issue of this Prospectus and the Closing Date:
  - (i) the financial statements of the Company for the financial year ended 30 June 2015 being the last financial statements for a financial year, of the Company lodged with the ASIC before the issue of this Prospectus; and
  - (ii) any half year financial statements of the Company lodged with ASIC since the lodgement of the last financial statements for the year ended 30 June 2015 and before the issue of this Prospectus; and
  - (iii) any documents used to notify ASX of information relating to the Company in the period from lodgement of the financial statements referred to in paragraph (i) above until the issue of the Prospectus in accordance with the Listing Rules as referred to in section 674(1) of the Corporations Act.

Copies of all documents lodged with the ASIC in relation to the Company can be inspected at the registered office of the Company during normal office hours.

The Company has lodged the following announcements with ASX since the lodgement of the 2015 audited financial statements:

Date	Description of Announcement
